

Quadruple Containers (QUADCON)

DESCRIPTION

Quadruple Containers (QUADCON) are modular, lightweight, and durable family of containers and accessories to be used for storage and transportation of organic equipment and consumable supplies during deployment and in garrison. The QUADCON, horizontal connectors, inserts and half length inserts will replace the metal mount out boxes. The QUADCON is ISO configured and CSC Certified. The removable inserts that are provided will be used for the storage of publications, administrative supplies and other small items.

PROCUREMENT PROFILE:	FY00	FY01
<i>Quantity:</i>	<i>1,401</i>	<i>1,400</i>

OPERATIONAL IMPACT

The QUADCON provides a significant increase in current capability by using modern technology to containerize and unitize break-bulk cargo. It is a weather tight, prefabricated, dimensionally standard and reusable container. They have the capability to integrate with container ships and other merchant vessels. They are a more efficient method of packaging and moving of cargo. They provide the degree of containerization required for rapid and efficient movement to the AOA.

PROGRAM STATUS

Thirty Percent (30%) of the QUADCONs have already been fielded. IOC was reached in FY94 with FOC scheduled for FY08.
